Experience

Lead Front End Engineer, Framestore

05/2022 - Present (2 years 6 months)

📍 London, UK

- Work on a bespoke SaaS smart signage product that is used on billboards and headquarters of leading investment banks across the globe. The product provides a complex suite of graphics editing, animation, scheduling and publishing services.
- Lead a team of 4 senior front end developers within a start-up-style environment.
- I helped build the software and pre- and post-launch, recruited new developers, reviewed code and proactively sought out and troubleshooted problems and implemented solutions to help ensure smooth delivery of features.
- Key technologies: React, Typescript, AWS (Lambda, Dynamo, S3), Material UI, CSS, Cypress.

Consultant Javascript full stack developer, NTT DATA

09/2021 - 07/2022 (11 months)

📍 London, UK

- Worked on a customer account management portal for BT/EE - the UK's largest telecommunications provider.
- Led a squad of frontend developers and testers within a larger dev team of ~50+ people.
- Used complex APIs to manage customer data and built a responsive UI featuring back end data visualisation and reporting tools.
- Key technologies: Next, React, Typescript, JavaScript, MSAL/Azure, API management, CSS, Storybook.

Senior Full Stack Developer, Nectar

07/2020 - 09/2021 (1 year 3 months)

📍 London, UK

- Worked on a variety of commercial projects including desktop tools and websites to visualise Nectar data from SQL databases with billions of rows of customer transaction data.
- Lead a small team of developers, data scientists and dev ops specialists who develop in-house tools for the Nectar loyalty scheme.
- I liaise with stakeholders and users to design UI concepts and user experiences for various apps, and write code related to permissions, APIs, browser setup (Webpack) and testing, as well as many other key areas.
- I helped team members overcome challenges, provided mentoring, reviewed code and proactively sought out and troubleshooted problems and implemented solutions to help ensure smooth delivery of products.

Experience

Web Developer/Editor, Ovcharenko 12/2015 - 06/2020 (4 years 7 months)

- Worked on a variety of commercial projects including e-commerce sites as well as providing digital content and content editing services.
- I make all my sites fully responsive, with user input forms, modals, custom styling and special optimizations for iOS.
- Experience deploying on Heroku, GitHub and Apache servers, both for front-end clients and backend servers using Node.js, JavaScript, Express and MongoDB Cloud.
- I also acted as a freelance editor, providing English-language support to a range of websites in the news, events and marketing industry.

Project Manager, Regina 03/2010 - 12/2015 (5 years 10 months)

- Worked as a project manager for an events startup.
- I was in charge of setting up a new London office and implementing all of the logistical and technical requirements of the business, from building databases and digital marketing, to managing subscriber email lists, maintaining a digital archive and preparing digital presentation materials for clients.
- I lead a team of 15+ staff, and worked on projects in cities including Berlin, New York, Moscow and Basel.
- Key technologies: HTML, CSS, Word press, FileMaker Pro, Photoshop, InDesign.

Project Manager, IBID 09/2006 - 11/2009 (3 years 3 months)

- Worked as a project manager for a London-based exhibitions and events company.
- I implemented all of the technical requirements of the business, including maintaining the company website, creating digital marketing content, administering network systems and maintaining a digital archive.
- I developed my skills for working under pressure on time-sensitive projects.

Web Developer, Self Employed 05/2004 - 08/2006 (2 years 4 months)

- Worked on building websites for local businesses and private clients.
- My largest project was developing a complete online e-commerce solution for a print sales business with a stock of over 10,000 items. I taught myself PHP and wrote custom scripts linking a CMS website to a MySQL backend database with data converted from FileMaker Pro. The resulting website produced a significant increase in turnover for the business upon launch.
- I developed my skills for producing simple-to-use, SEO-friendly, database-driven websites.
- Key technologies: HTML, PHP, CSS, Drupal, Apache, FileMaker Pro, MySQL.

Education

University of London 1999 - 2002 (3 years)
BA History, 2:1

Cherwell School 1996 - 1999 (3 years)
Maths A-Level, A

Projects

Personal website 10/2024 - Present (1 month)
<https://www.eveleigh.co>

- Built a personal website to showcase my CV.
- Key technologies used: Typescript, Next.js, Tailwind CSS

Projects

CV Explorer

09/2024 - 10/2024 (2 months)

<https://cv-explorer-seven.vercel.app/>

- With the release of the Anthropic API, I decided to build a SaaS which allows users to get insights from an uploaded CV.
- This is a great way to show the power of Artificial Intelligence in action.
- Key technologies used: Anthropic API, Next.js, Tailwind, Teeseract.js OCR

What Visa?

09/2020 - 07/2023 (2 years 11 months)

<https://whatvisa.com>

- Built a SaaS product to help people check their eligibility for Skilled Worker visas in the UK.
- Designed and built the product from scratch in association with a London-based legal consultancy.
- Gained accreditation from the Office of the Immigration Services Commissioner.
- Skills used: Next.js, Typescript, Firebase
